Gurjung Singh

Frontend Engineer • React.js • Next.js • TypeScript

+91-9779917710 gurjung997@gmail.com LinkedIn Github

Summary

Frontend Software Engineer with 3+ years of experience designing scalable, high-performance web applications using React.js, Next.js, TypeScript, and modern JavaScript. Experienced in building reusable component libraries, optimizing application performance, improving Core Web Vitals, and developing enterprise-grade customer platforms. Focused on frontend architecture, performance engineering, accessibility, and delivering intuitive, reliable user experiences.

Key Achievements

- Reduced customer response time by **50%** through multichannel communication integration across **SMS, Calls and WhatsApp**.
- Designed and developed a **reusable NPM component library**, reducing frontend development effort by **30%** and improving UI consistency across applications.
- Reduced JavaScript bundle size by **60** – **75%** by auditing and removing unnecessary npm dependencies, combined with CSS/JS minification, code splitting, and lazy loading.

Experience

BJS Home Delivery Oct 2022 – April 2026
Frontend Engineer *Chandigarh, India*

- Architected a **modular NPM-package-based frontend** for the **Delivery & Transport Management System**, enabling **independently deployable and reusable feature modules** that accelerated feature development and simplified long-term maintenance.
- **Engineered reusable React and TypeScript components** with built-in accessibility (semantic HTML, keyboard navigation, WCAG compliance) and performance optimizations, establishing a **scalable shared UI architecture** adopted across multiple frontend applications.
- Consolidated 5 internal tools into this unified platform for **2000+** users, reducing tool-switching time by **30%** and automating manual invoicing/debriefing for **6000+** deliveries/day during peak season.
- Engineered agent-facing UI on Twilio-Flex and developed integration logic and business workflows across contact center platforms **(Twilio-Flex, Zoom Contact Center)**, improving agent efficiency.
- Leveraged AI tools including **ChatGPT, Claude, and Antigravity** to accelerate frontend development, assist debugging, generate documentation, support code reviews, and reduce repetitive engineering tasks.
- Collaborated cross-functionally with product, backend, and design teams to deliver scalable frontend solutions while enforcing code quality through reviews and engineering best practices.

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript

Frontend Technologies: Reactjs, Nextjs, HTML5, CSS3, Tailwind CSS, Styled-Components

State Management: Redux, Jotai, Context API, React Query

Performance: Lazy Loading, Code Splitting, Memoization, Lighthouse Optimization, Core Web Vitals

Testing: Jest, React Testing Library

Backend Integration: REST APIs

Tools : Git, GitHub, Bitbucket, NPM, Vite

Concepts: Frontend Architecture, Component Design, Responsive Design, Accessibility (WCAG), SEO

AI-Augmented Development: ChatGPT, Claude, Antigravity

Education

Guru Nanak Dev Engineering College, Ludhiana Aug 2016 - June 2019 ***B.Tech :***
Electronics And Communication Engineering (ECE) ***CGPA : 9/10***
