Gurjung Singh

Frontend Engineer • React.js • Next.js • TypeScript

+91-9779917710 gurjung997@gmail.com LinkedIn Github Portfolio

Summary

Frontend Software Engineer with 3+ years of experience designing scalable, high-performance web applications using React.js, Next.js, TypeScript, and modern JavaScript. Experienced in building reusable component libraries, optimizing application performance, improving Core Web Vitals, and developing enterprise-grade customer platforms. Focused on frontend architecture, performance engineering, accessibility, and delivering intuitive, reliable user experiences.

Key Achievements

- Reduced customer response time by **50%** through multichannel communication integration across **SMS, Calls and WhatsApp**.
- Reduced JavaScript bundle size by **60** – **75%** by auditing and removing unnecessary npm dependencies, combined with CSS/JS minification, code splitting, and lazy loading.

Experience

BJS Home Delivery Oct 2022 – April 2026

Frontend Engineer *Chandigarh, India*

- Architected a **modular NPM-package-based frontend** for the **Delivery & Transport Management System**, enabling **independently deployable and reusable feature modules** that accelerated feature development and simplified long-term maintenance.
- Built a reusable **NPM component library** with React and TypeScript, standardizing accessible and performance-optimized UI components across applications while reducing frontend development effort by **30%.**
- Consolidated **5** internal tools into the unified platform for **2000+** users, reducing tool-switching time by **30%** and automating manual invoicing/debriefing for **6000+** deliveries/day during peak season.
- Engineered agent-facing UI on Twilio-Flex and developed integration logic and business workflows across contact center platforms **(Twilio-Flex, Zoom Contact Center)**, improving agent efficiency.

Projects

DevBoard Platform | *Next.js*, *React*, *TypeScript*, *React Query*, *PostgreSQL* Github

- Architected a multi-tenant project management platform using **Next.js**, **TypeScript**, **PostgreSQL**, and **Prisma**, implementing **RBAC** and **defense-in-depth authorization** across middleware, API, and UI layers, with a token-based invitation system and transactional state management.
- Built and deployed the platform on **Vercel**, implementing **cursor-based pagination** and **drag-and-drop** across unified Table, Kanban, and Calendar task views backed by **React Query** and a shared data layer with test coverage for critical workflows.

Technical Skills

Programming Languages: JavaScript (ES6+), TypeScript
Frontend Technologies: Reactjs, Nextjs, HTML5, CSS3, Tailwind CSS, Styled-Components
State Management: Redux, Jotai, Context API, React Query
Performance: Lazy Loading, Code Splitting, Memoization, Lighthouse Optimization, Core Web Vitals
Testing: Jest, React Testing Library
Backend & APIs: Node.js, Express, PostgreSQL, MongoDB, REST APIs
Tools : Git, GitHub, Bitbucket, NPM, Vite
Concepts: Frontend Architecture, Component Design, Responsive Design, Accessibility (WCAG), SEO
AI-Augmented Development: ChatGPT, Claude, Antigravity

Education

Guru Nanak Dev Engineering College, Ludhiana Aug 2016 - June 2019
B.Tech : Electronics And Communication Engineering (ECE)
CGPA : 9/10
